

**BYC Storm / Hurricane
Members Communications Plan
8/2023**

Level 1: BYC Storm/Hurricane Watch - (Early Warning / Head's-Up)

There is a storm or hurricane that could be headed for Bristol.

- **Expected Impacts:** It is too early to predict the possible impacts of this storm. Members should be aware and keep an eye on the weather.

What actions should members take:

- Follow any directions of the Chief Steward.
- Watch local and nation weather forecasts for more detailed information.
- Make sure that your boat is securely moored and that the ground tackle has been inspected and is in good condition. (Check with your mooring contractor well ahead of time)
- Have a plan to remove all boats tied to BYC docks on further notice. No boats are allowed to be tied to BYC docks during a storm.
- Have a plan to remove your boats, dinghies, kayaks, paddle boards, wind surfers and other stuff from the club property on further notice. BYC needs the space for the club/EBSF boats as well as the floats.
- BYC staff will not have any time to attend to members boats, they are your responsibility.
- Be prepared to move your car off club property.
- Be prepared to assist the club if we need to secure the house, haul the launches & committee boat, pull the floats, and secure the EBSF boats.
